

Access-to-Time Ltd - Recommendations

Martin Carwardine & Co

(on a uAttend system) – “I didn’t really have any initial worries, as setting up was relatively straight forward and the system was pretty much what we wanted. I had it up and running in a few minutes with no problems. And I felt very relieved. I can (now) concentrate on the things that I *should* be getting on with.

The system is perfect...It’s really easy to use and all the information you need is on a web page. Our staff find it easy to use, too, so there’s no problems at all now.

The system has really changed our business for the better. My employees can now see how and why they are paid. I can print off their clocking on and clocking off times and put it in with their pay packet, and they can quite clearly see that these are the hours they’ve worked and that’s why they’re being paid x amount this month.

I recommend the A2T uAttend system to other businesses – it’s an excellent system!”

James Staff

Finance Officer

Rowse Honey

“After seeing the Focus T & A system at a reference site it was agreed that this product was a good match for our needs. We felt Focus would comfortably be able to handle all of our payroll and reporting requirements, whilst at the same time being a lot faster and more robust than Timelog, and at the same time priced very competitively. We felt that given how well A2T knows our business, it made sense to stick with them. We have also been impressed by the level of friendly, personal support that we have received from A2T over the years, so we felt confident we would receive the same good quality service during and after the implementation.

During the implementation A2T were very responsive and helpful in getting any issues we were experiencing ironed out. We were also very impressed by the responsiveness of the software vendors (HR Industries) who made several updates to the software to meet our requirements. We received two days of training as part of the implementation.

We have been using Focus solely for three months now and we are very happy with it. We estimate we are saving at least ½ a day every week processing reports / exports. The system has proven itself to be reliable, robust and flexible enough to meet all our reporting requirements. A2T have provided a very good quality of service throughout and I would not hesitate to recommend A2T and Focus to anyone.”

Access-to-Time Ltd - Recommendations

Southampton Cargo Handling

“Access-to-Time was an extremely lucky find. We were looking for a supplier for an access control and time recording system in our new premises, and your ability to understand our requirements was way ahead of anybody else we spoke to. This was matched by the delivery of the final system under the difficult circumstances of an office move, in a flexible, friendly and timely manner. Since the initial installation our requirements of the system have evolved and you have always been ready and willing to work with us to meet our changing needs, even when they have not conformed to any pre-determined standards.”

Tony Hearn

IT Manager

Sapa Profiles Ltd

“The team at Access-to-Time supplied our company with a Time & Attendance system, hardware & software. The project was conducted in a highly professional and timely manner, more importantly after sales service is second to none in that problems are dealt with immediately and seamlessly. It is a pleasure doing business with a company that you can trust.”

Kevin Donnelly

HR Manager

Specsavers – Airways Optical

“Alastair (Access-to-Time’s Director) provided Airways Optical (Specsavers) with a first class service - he is technically very competent and delivered our requirements in a timely and professional manner. His people management skills are excellent and he communicates brilliantly with all levels of staff. I would have no hesitation in recommending Alastair to anyone looking for time management tools & services.”

Group Project Manager

Why Access-to-Time Ltd?

Because we'll make sure you get exactly the system you need! That's the Access-to-Time difference, and that's what makes our clients happy to recommend us...it's our guarantee, a system that suits your requirements, or your money back.

With Access-to-Time you get:

- Expert advice from Time & Attendance / Access Control professionals who'll ensure they understand your needs before proposing a solution
- Stress and interruption-free project management of your installation
- Reliable on-going support before, during and after installation

Time & Attendance

Just need to check on your employees' attendance? From wherever you happen to be? Or do you have a group of managers who need to manage their staffs' time and attendance exceptions efficiently, including authorisations? Maybe you need to accommodate flexitime as a customisable absence, or the Bradford Factor report for absence monitoring...Whatever your specific need, we can suggest a system that will meet it.

From simple Cloud-based systems you could install yourself through to complex SQL-based systems with full client-server capability and access control, Access-to-Time have all the answers to every question you might have.

Access Control

Want to control who has access through which doors or gates and when? Access-to-Time can help. If you only need access control without time management, that's fine, or if you'd prefer an integrated solution that includes Time and Attendance we can supply a system allowing your staff to use the same token for both functions. It's up to you.

Biometric Options

From our rugged hand-scan technology to the simplicity of fingerprint recognition, Access-to-Time can supply systems that record exactly who is clocking in and when!

Search Selectors

With a choice of battery powered hand-held units up to a fully-featured unit with a rapid variable percentage selection option, we can help you demonstrate that your searches are fair and unbiased. We can also offer connection to access control, including barrier operation, and remote percentage selection. Remote control of the percentage search ratio is also possible where required.
